

Pinki Kumari

Second Year Graduate

Department of Computer Science and Engineering

pinkikumari22.github.io

Education

Degree	Institution	CPI	Year
MTech	IIT Gandhinagar	7.6	2022 - Present
BTech	VGI Microsoft, Greater Noida (AKTU)	8.33	2016 - 2020

Experience

- **Teaching Assistant, Indian Institute of Technology Gandhinagar:**
 - **Computing(ES112):** Designing and conducting lab tasks, checking assignments [Aug 2023 - Present]
 - **Aarohan(FP601):** Managed orientation of 450+ students with a team of 25 TAs, and was in the backend team, including 5 people [17 - 28 July 23]
 - **Data-Centric Computing:** Conducted labs and tutorials on topics of ML, EDA, Algorithms [Jan - July 23]
 - **Computer Networks(CS433):** handled a class of 75+ students and conducted quizzes, checked assignments, and assessed final project presentations [Aug - Nov 22]
- **Summer Intern, ThirdAI Corp.:** [June 1st - July 31st, 2023]
 - Utilized ThirdAI's Universal Deep Transformer (UDT) for pre-training, training, and fine-tuning on LLMs on CPU instead of GPU
 - Embedded evaluation system for benchmarking various models like BERT, Open AI, LLaMA, and BOLT

Skill Summary

- **Languages:** Python, SQL, HTML5, CSS
- **Data Science Tools and Libraries:** Kaggle, PyTorch, TensorFlow, Matplotlib, Scikit-Learn, Numpy, Pandas
- **General:** Machine Learning, Deep Learning, Natural Language Processing

Projects

- **Hashing Algorithms for efficient training of LLMs and applying LSH on NTK:** [Jan 2023 - Present]
 - The objective is to probabilistically infer desired outputs without the need for explicit training of neural networks. This involves the construction of the NTK matrix(H^*).
 - Utilization of Locality Sensitive Hashing (LSH) in conjunction with Neural Tangent Kernels (NTK), under the guidance of [Prof. Anirban Dasgupta](#)
 - Applied concepts from Optimization Theory in Machine Learning and incorporated neural network principals
- **Online Maintenance Complaint Portal:** [Jan - April 2023]
 - Designed a website for IIT Gandhinagar and created an Online Maintenance Complaint Portal that addressed earlier existing challenges, including page reloading, authentication, and potential security vulnerabilities
 - The task involved enhancing user experience and fortifying the website against potential threats
 - Proficiently utilized SQL, Python, Flask, HTML5, and CSS
- **Contact List Search:** [Personal Project]
 - Developed a user-friendly web application for contact management, featuring contact addition and deletion capabilities using buttons
 - Implemented autocomplete functionality to enhance user experience, providing real-time contact name suggestions while typing

Achievements

- Secured All India Rank (AIR) 61st (Armed Forces Quota) in Bihar Combined Entrance Competitive Exam (BCECE)
- Qualified for the GATE (CS) twice (2020, 2021)
- Secured 8th rank in the International Olympiad of Mathematics 2010
